The Adoption Reader

Edited by Susan Wadia-Ells

This book is a collection of birth mothers, adoptive mothers, and adopted daughters, their stories, feelings, and life experiences dealing with adoption.

This collection is well written and covers various stages, and issues dealing with placing a child for adoption, adopting a child, and being the adopted child.

The book gives good examples of the emotions, heart aches, and joy from the families that have lived with the choices that were made about adoption from their points of view.
